

ALLAN ROY

B.Tech Computer Science & Engineering (Cyber Security) · SRM IST · 2028
ar8051@srmist.edu.in · +91 81299 38737 · linkedin.com/in/allanroy10 · github.com/ALLaNRoY-TECH

Computer Science (Cyber Security) undergraduate with strong interests in software engineering, backend development, and application security. Experienced in designing and developing secure full-stack applications using modern technologies including Next.js, React, TypeScript, Python, SQL, and Supabase. Passionate about building scalable systems, solving real-world problems, and continuously expanding expertise in secure software development and cybersecurity.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C, SQL
Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion
Backend: Flask (Python), REST API Design, Server-Side Rendering, Middleware
Databases: MySQL, Supabase (PostgreSQL), Database Schema Design
Auth & Security: Google OAuth 2.0, JWT, Session Management, RBAC, Input Validation, OWASP Top 10, Secure API Design
Dev Tools: Git, GitHub, Postman, VS Code, npm, Vercel
Operating System: Linux (Ubuntu), Windows

PROJECTS

SubSense — AI-Powered Subscription Intelligence Platform *June 2026*

Next.js · TypeScript · React · Supabase · Google OAuth 2.0 · Gemini AI · Tailwind CSS · Vercel

- **Architected** a production-deployed full-stack SaaS platform on Vercel that auto-detects recurring subscriptions by parsing Gmail receipts and PDF bank statements, supporting 11+ services (Netflix, Spotify, Adobe, Amazon Prime) via payment pattern recognition.
- **Implemented** Google OAuth 2.0 with protected route middleware, enforcing secure session validation and preventing unauthorized data access via server-side API handling and environment variable isolation (.env).
- **Engineered** 12–18 RESTful API endpoints with standardized JSON schemas, input validation, and structured error handling — integrating Gmail API, PDF parsing, and Gemini AI to generate subscription health scores and savings recommendations.
- **Designed** a real-time analytics dashboard with duplicate subscription detection, recurring payment tracking, and spending visualization using React, TypeScript, and Framer Motion.

VentPod — Anonymous Peer Support Platform *April 2026*

Python · Flask · MySQL · JavaScript · HTML · CSS

- **Developed** a privacy-first anonymous communication platform in Flask and MySQL, architecting a schema that decouples user identity from message content — assigning anonymous identifiers to prevent personal information exposure.
- **Built** RESTful backend APIs handling message routing, anonymous user matching, and session lifecycle management with standardized error responses and input validation across all endpoints.
- **Enforced** anonymity at the data layer — designing the database schema to minimize retention of personally identifiable information rather than relying solely on UI-level obfuscation.

Hostel Complaint Management System *April 2026*

Python · React · MySQL · REST APIs

- **Engineered** a role-based complaint management system with three access tiers (Student, Warden, Administrator), enforcing RBAC through authenticated sessions to restrict views and actions by user role.
- **Designed** a normalized MySQL schema supporting full complaint lifecycle management — categorization, status tracking, assignment, resolution history, and audit report generation.
- **Built** RESTful APIs for complaint submission, status updates, and notification triggers — streamlining escalation workflows and reducing manual follow-up overhead.

LEADERSHIP & EXTRACURRICULARS

Head of Corporate | Coding Ninjas 10x Club, SRM IST *2024*

Led a 100+ member club driving collaboration and event operations; organized a national-level hackathon with 1,000+ participants from 20+ colleges — managed sponsorships, partnerships, and full logistics.

National Cadet Corps (NCC) — A Certificate Holder

Completed structured leadership training; participated in RDC and Combined Annual Training Camps (CATC).

Captain, School Basketball & Football Teams

Zonal-level semi-finalist; competed in Table Tennis and Badminton inter-school tournaments.

EDUCATION

SRM Institute of Science and Technology, Kattankulathur, Chennai *2024 – 2028*

B.Tech – Computer Science & Engineering (Cyber Security) · CGPA: 7.98 / 10
